Please write your IOS customer number. For faster service, we kindly ask you to use your customer number when ordering.

A BRAND
BUILT ON
TRUST

IOS was created for you!! It exists to provide customers worldwide with high quality products, reasonable prices and excellent customer care. Customer satisfaction is our main goal, which we pursue through total commitment to our products' quality standards. This is the mission we put into practice every day. With IOS as your provider, you will have access to a wide variety of colors, designs, sizes, and materials to suit every age and every need allowing it to become easy to satisfy your patients' needs and preferences; while giving the doctor and patient that perfect smile.

Why Choose IOS?

- QUALITY
- AFFORDABILITY
- ACCESSIBILITY
- FLEXIBILITY

History

Starting off as a small group of orthodontists in 1985, a never ending market was in the making. The demand for the manufacturing of products exceeded expectations worldwide creating an opportunity for the group to become its own company. Indeed it did in 1996 when this creative team created their very first product; The O-Tie Elastic. Just two years later in 1998 this movement became an independent innovative U.S. Manufacturer and supplier of luxury orthodontic products, for orthodontists nationwide and globally through authorized agents naming it the International Orthodontic Services known as IOS.

Quality & Policy

High-precision products create high-precision results. IOS products are meticulously designed, produced, sealed and delivered. Every IOS product is the result of a complete and consistent product protocol. From product engineering to manufacturing, testing, strict quality control, assembly and packaging, to sales reps and customer service representatives, we spare no effort or expense to ensure they perform beyond expectation in order to make treatment a pleasure for you and your practice. Our products are tested, via contemporary methods, for optimum and consistent performance. They are made in the United States with quality guaranteed (FDA and CE certified). To fulfill this purpose, IOS is pursuing steady growth to fully develop its infrastructure in line with industry developments and emerging industry technologies in order to reach new markets through global fair trade participation. IOS constantly pursues all that is new and scientific, and this allows us to anticipate product needs and trends.

Easily approachable, totally flexible

IOS believes the secret of its success is customer trust in every product carrying the IOS name. Each of our products is a trademark of trust. Each carries our passion and commitment to serving you at the highest available standards. When you see the IOS name on a product, you can be certain you are buying the finest orthodontic products available anywhere.

A rapidly growing global enterprise, IOS is committed to remaining as personal and dedicated as any local supplier. Still run by its owners, IOS has the agility and flexibility that larger corporations don't. We know orthodontists and dealers lead dynamic businesses with dynamic needs. The warm accommodating way we do business meets those needs.

The Firm and our reps are in continuous contact with clients to ensure their satisfaction with our products. Our reps can also visit or email you regularly to present monthly information giving you a constant update on our current or new products. IOS is committed to providing the easiest and fastest means of communication with clients, providing our sales reps with the proper means to conduct sales and receive orders worldwide.

INFINITY Expander

INFINITY - Hex head TAD

INFINITY L - Hex head TAD

INFINITY X - Cross head TAD

Templant - Temporary restoration TAD

ORTHODONTIC ANCHORAGE SYSTEM

Slim design; minimizes root & bone damage, No pilot-hole is needed; self-tapping and self-threading screw.

Infinity case For storage & sterilization

Item # 20-300

Rounded end: excellent hand hold

Swivel Handle for easy insertion & better control

Infinity handle:

Item # 20-201

Mini Handle*

Item # 20-210

Used with slow speed attachment

Press to release the slow speed attachment

* Must order with Slow Speed Attachment

how to place a mini implant in 8 steps

- 1** Prepare the area by applying a topical antiseptic such as Chlorhexidine

- 2** Use the desired anesthetic agent either as topical or local

- 3** Locate the implant insertion point using a fine explorer

- 4** With the implant loaded on the handle, insert the implant initially perpendicularly to the bone surface

- 5** As the implant is going inside the bone, start tilting the handle about 20° toward the occlusion

- 6** Once the implant stops progressing, tweak the handle and the implant head will disengage

- 7** Take a PA to document implant position

- 8** You can load the implant immediately with forces less than 300 gm

new

INFINITY *Expander*

IOS infinity Skeletal expander is a uniquely designed surgical RPE used in patients with severe narrow maxilla. The surgical expander has 4 incomplete holes with guided surfaces for easy implants insertion. Each hole has two wings to allow expander removal emergency cases by tweaking the expander sideways.

IOS Surgical Skeletal Expander is an excellent alternative to traditional SARPE procedure for qualified patients.

Must be used with Infinity L TADs #20-131

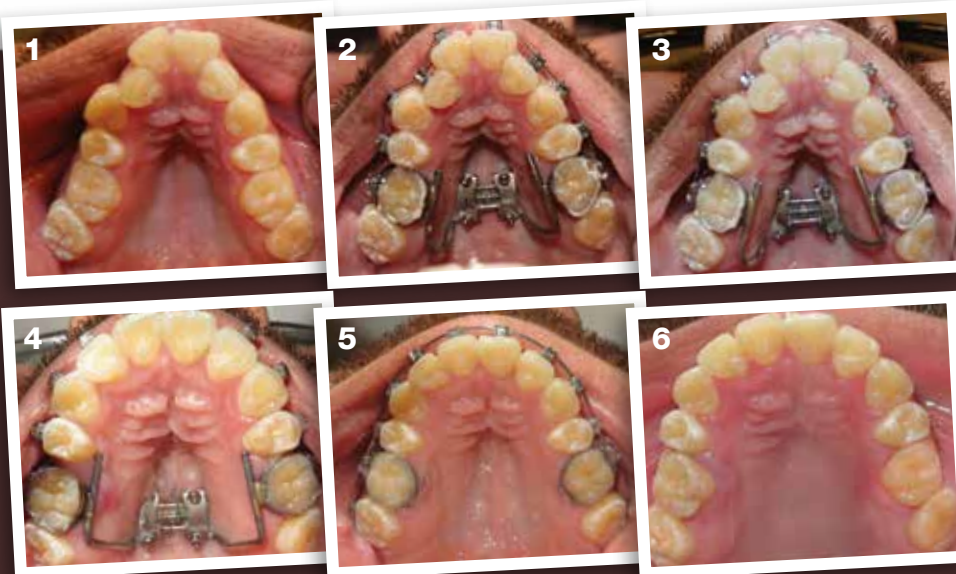

Precision engineered guiding surfaces to allow straight and parallel insertion of 4 mini implants.

The implants holes are within the expander's body for extra support and to minimize the expander's size.

Item #	Size	Full Turn	Maximum Expansion
19-533-100	7 mm	0.8 mm	12 mm
19-533-101	9 mm	0.8 mm	14 mm

The unique incomplete-hole-adesign will provide enough support to hold the mini-implants, and in the same time allow an easy emergency removal of the mini implant.

* To insert the mini implants, we recommend to use a mini handle or a slow speed attachment with 50 RPM.

Item # 20-220

INNOVATIVE BRACKET KIT

IOS is pleased to introduce its newest kit design for better bracket storage and patient delivery. Each kit keeps your brackets in an individual storage area so you can use them as needed. Each kit stores your brackets in a sealed and clean environment until patient is ready for bonding. Its new look Enhances your patient presentation.

Each bracket is stored in an individual place

Self Ligating Brackets

iActive™

A unique self-ligation bracket due to its hybrid clip.

Stainless Steel Brackets *"Sand-blasted mesh, Torque in-the-base"*

MAXline™

A trapezoid bracket with larger base and bigger tie wings. MIM.

razor™

Extremely low profile bracket similar to the Victory® bracket from 3M-Unitek. Casted.

MAJESTIC™

This is the crown jewel of IOS SS brackets. It combines the Razor's low profile with the Max's sturdiness. MIM.

Ceramic Brackets

PHANTOM LP™

A high quality polycrystalline ceramic bracket with a low profile design.

PHANTOM luxe™

The next level of aesthetic ceramic brackets. A glare-free Alumina Oxide ceramic bracket with mechanical lock base.

PHANTOM plus™

A silver lined polycrystalline ceramic bracket to reduce friction during treatment. Recommended in extraction cases.

PACTIVE™

DUAL MECHANISM
TO OPEN THE CLIP
FROM THE FACE OR
THE BASE.

PERMANENT DENT
FOR BRACKET
ORIENTATION.

BEVELED ENTRANCE MINIMIZES
WIRE FAILURE AND INCREASES
INTER-BRACKET DISTANCE.

BODY IS MADE
FROM 17-4
STAINLESS STEEL
FOR SUPERIOR
STRENGTH AND
DURABILITY.

SMART CLIP,
PASSIVE CLIP
WITH LIGHT WIRES,
ACTIVE CLIP WITH
HEAVY WIRES.

ROUND DESIGN FOR
MAXIMUM PATIENT
COMFORT.

Pactive is a unique self-ligation bracket due to its hybrid clip. The clip is passive during leveling and aligning stage by using small wires and then gets active when heavier wires are engaged. The hybrid clip combined with the beveled wire entrance offer an ultra-low friction bracket system.

|  U Bicuspids |  L 2 nd Bicuspid |

Passive Phase

With light archwires, the bracket is passive, resulting in minimal archwire contact and low friction for efficient leveling and alignment.

Active Phase

Heavy archwires engage the ligating mechanism, offering full control for finishing and detailing.

Ceramic Bracket Debonding Plier

Item #18-435
check page 117

REBONDING A BRACKET

1. Make sure bracket is not damaged.
2. Carefully remove any excessive adhesive from base.
3. Apply porcelain primer "17-411-100" to the base.
4. Follow regular bonding procedure.

BRACKET REMOVAL

1. Never remove ceramic brackets while the wire is in the slot.
2. Using a debonding plier, grasp the bracket mesiodistally at the base and twist gently to remove.
3. Use an adhesive removing plier if some ceramic is left on the tooth.

PHANTOMTM Luxe

ADVANCES IN MATERIALS, MANUFACTURING TECHNOLOGIES & BRACKET DESIGN,

have enabled a new level of performance in the Phantom brand of aesthetic brackets.

PHANTOM LUXE CERAMIC BRACKETS ARE MADE OF MONOCRYSTALLINE ALUMINA, *AS FINE CRYSTALS*, TO IMPROVE THE INHERENT MATERIAL STRENGTH.

- └ Unique ceramic material for unmatched aesthetics.
- └ Lowest profile and rounded top shape for unmatched comfort.
- └ Rounded entry and exit of slot for lowest friction.
- └ 15 degree downdraft on tie wings for safe ligation.
- └ World's proven mechanical bonding base for excellent bonding strength and easy de-bonding.
- └ 45% less friction compared to other clear brackets.
- └ Prescriptions: Roth and MBT.

Weldable Lingual Attachment

Lugs
Simple way for easier band seating and removing.

Item # 12-599-100

Lingual Cleats
Designed to hold elastics when needed, also acts as a seating lug.

Item # 12-599-101

Button
Weldable lingual buttons. Designed to fit bands perfectly.

Item # 12-599-102

Weldable Lingual Sheath
.072" height to fit TPA securely with indent for locking.

Item # 12-599-103

Weldable Lingual Sheaths with hook
.072" height to fit TPA securely with mesial or distal hook.

Mesial per pack Item # 12-599-104
Distal per pack Item # 12-599-105

Do you have many useless bands sitting around?

Switch to True Band™ and IOS will exchange your old bands for FREE!**

BONDABLE TUBES
ARE AVAILABLE IN
TWO SERIES

Classic Bondable Tubes

Bondable tubes have a laser welded mesh base with anatomical shape for easier tube placement and better adhesion. The mesh base is micro-etched for retention enhancement. All tubes have a funnel entrance for easier wire placement.

	Prescription	Torque	Distal offset	Length	Right 0.18	Left .018	Right .022	Left .022
Upper	Roth/MBT	-14	10	6.85 mm	12-600-114	12-600-115	12-600-118	12-600-119
Lower	Roth	-30	4	6.85 mm	12-600-116	12-600-117	12-600-120	12-600-121
Lower	MBT	-20	0	6.85 mm	12-600-124	12-600-125	12-600-128	12-600-129

IOS buccal tubes are manufactured by Metal Injection Molding “MIM”. With MIM, buccal tubes are produced with smoother surfaces, high accuracy and better stiffness.

Mini Uni Bondable Tubes

Mini bondable tubes provide an easy alternative to band partially erupted teeth.

	Prescription	Torque	Distal offset	Length	Right 0.18	Left .018	Right .022	Left .022
Upper	Roth/MBT	0	0	3.75 mm	12-600-100	12-600-101	12-600-104	12-600-105

IOS understands that selecting that proper wire during treatment is an essential part of contemporary orthodontics. Thus, we are committed to providing you with a wide variety of wires in different shapes and sizes that fit all your needs.

Our strict quality control policy will guarantee your satisfaction and assure the highest quality in arch form, working force & bendability of the wire. Every batch of wires is tested by modern testing machines to ensure optimum and consistent performance.

ALL WIRES ARE PACKED IN A SEALED PACKAGE TO MAINTAIN CLEANLINESS AND ASSURE A PROFESSIONAL LOOK IN FRONT OF PATIENTS.

MIDLINE IDENTIFICATION

The midline is identified either by a mark or a bend:

Marked Midline

Three Lines for upper, one line for lower

- ▶ IOS SS archwires are midline-etched for permanent identification
- ▶ IOS NiTi archwires are Laser-marked for permanent identification

Dimpled Midline

- ▶ Acts as a stop to prevent wire drift
- ▶ Available in NiTi and Thermal NiTi
- ▶ Great for initial stage of treatment

▶ **KNOW

OF WIRE SIZE
& MATERIAL
ON STIFFNESS**

ARCH FORMS

Because variation exists from one patient's arch form to another, IOS provides archwires in three popular arch forms.

Stainless Steel Archwires

Manufactured from 304V medical grade stainless steel.

10 WIRES
PER PACK

- ▶ Comes in five round and eight rectangular sizes.
- ▶ Available in two types:
 - **Bright Stainless Steel** archwire; Ideal for any treatment phase, most popular type and could be heat-treated for additional strength.
 - **Gold-Tone Stainless Steel**; Heat-treated archwire, 5-10 % higher tensile strength than bright SS archwire, stress-relieved wire that resists distortion and accepts bends without fracture. Great for deep bite cases and torque control.

Multi-Strand SS Archwires

- ▶ This is an 8-strand-braided stainless steel archwire similar to D-rect™ from ORMCO. It is effective as a finishing wire to retain torque and allow vertical movement for settling.
- ▶ Accepts bends using a regular bird beak 18-201 or a detailing plier #18-303.
- ▶ **Available in 5 different sizes.**

Elgiloy Wires

EXCELOY Straight Cut 14”

- Exceloy is a wire made of a cobalt-chromium alloy. It is supplied in a soft form which is easier to bend. Then, it can be heat-treated to increase its stiffness to a level equivalent to regular stainless steel.
- Fatigue resistant wire that will never break!
- Excellent for bending, soldering or welding
- Great for Edgewise mechanics and removable retainers
- Available in Blue Elgiloy only.

Nickel Titanium, Overview

Definition

NiTi is a shape memory alloy that remembers its geometry. After it is deformed, it regains its original geometry by itself during heating (Thermal NiTi) or simply during unloading (pseudo-elasticity). Orthodontic NiTi archwires consist of about 55% nickel and 45% titanium.

History

The nickel-titanium alloys were first developed in 1962-1963 by the Naval Ordnance Laboratory and commercialized under the trade name Nitinol. George Andreasen, an Orthodontist from Iowa, developed his own formula and was awarded U.S. Pat. No. 4,037,324 in 1979.

Crystal Structures

Why does NiTi conserve its unique properties? Unlike other alloys, NiTi undergoes phase changes while re-

maining solid. These phase changes, known as martensite and austenite, “involve the rearrangement of the position of particles within the crystal structure of the solid”. In NiTi, these phase transformations occur below the melting point. Thus, the alloy can retain its shape without melting.

Martensite phase

A Crystal type of NiTi, which is characterized by a cubic body-centered lattice structure. This phase is

the soft state of NiTi and has a lower delivery force than the Austenite phase.

Austenite phase

A crystal type of NiTi which is characterized by a face-centered lattice structure. This is the hard phase where the wire delivers its force. After deformation into a martensite phase, a NiTi wire can regain its shape either by pseudo-elasticity or by thermo-elasticity.

Ultimate Super-elastic NiTi

- ▶ Super elastic NiTi is provided in its austenitic phase at all times. The super rebound and memory characteristics ensure desired results without the need for adjustment or modification.
- ▶ Super elastic NiTi allows for a high degree of deflection without causing deformation of the original archform characteristics.
- ▶ Efficiency of performance ensures achievement of objectives without need for multiple staging of archwires as with stainless steel alternatives.
- ▶ Available in Natural form, Broad form and Standard form.

Ultimate™ NiTi Heat Activated

Easiest of NiTi wires to engage

10 WIRES
PER PACK

- ▶ Extremely light continuous force that effectively move teeth with minimal patient discomfort.
- ▶ Dead soft when chilled below 5°C and the thermal properties achieve optimum activation at 37°C.
- ▶ Early rectangular wire engagement for early torque control.

RECOMMENDED
TO USE WITH

NiTi Chilling Tool

Fill the tube with water, place it in the freezer, once frozen, then you are ready to go. Slotted head for easier wire placement.

Item #18-881

TIP
An economical way to soften a thermal NiTi is to moisten a cotton swab and freeze it. Insert the thermal wire and then chill desired area with the cotton swab.

LIMBER™

COPPER-NICKEL TITANIUM ARCHWIRES

IOS Copper Nickel Titanium Archwires are not your ordinary NiTi archwire!
The blend of copper in the raw material, along with our advanced manufacturing process, provide unique advantages that can be appreciated by both the patient and the orthodontist.

Our wire exhibits lower loading forces, which eases wire engagement and reduces patient discomfort. Our archwire exhibits more consistent thermal active force and maintains the constant force for a greater distance of unloading and tooth alignment. These features offer an opportunity for extended time periods between patient wire changes.

IOS Copper Nickel Titanium Archwires... a wire with the properties to reduce chair time and tackle your practice's most challenging cases.

Clinical Advantages

- ▶ A true super elastic wire with thermo elastic shape memory.
- ▶ Generates more consistent tooth movement as the wire is active longer in the optimal force range.
- ▶ Offered in multiple transformation temperatures to provide the right wire for your unique case.
- ▶ The higher the temperature transition (TTR), the lower the relative forces delivered by the wire.
- ▶ The lighter forces exhibited by the copper nickel titanium and its high flexibility, allow these wires to be engaged in cases with moderate to severe tooth to tooth misalignment.
- ▶ Longer clinical activation promotes reduced chair time and greater durations between wire changes.
- ▶ Independent testing has shown that the copper nickel titanium wire demonstrates maximum unraveling of crowding over a period of time, when compared to nickel titanium and stainless steel.
- ▶ The addition of copper has been known to increase corrosive resistance and control the hysteresis width.

FEATURES OFFERED

- Currently available in both 27° C (medium) and 35° C (light) at transition temperatures
- Offered in most orthodontic wire sizes and arch forms
- Ultra smooth finish to reduce friction

come with
2 STOPPERS*

Use 27°C Copper when higher force levels are needed.

Use 35°C Copper when Medium force levels are needed.

Reverse Curve NiTi; R-NiTi

Super-elastic R-NiTi

The same high quality as super elastic NiTi

- ▶ Great to open deep bite cases and control arch levelness during canine retraction.
- ▶ 3-Dimensional control of teeth movement to counteract the side effect of closing chain "with regular R-NiTi".
- ▶ Available in round and rectangular sizes, regular and straight leg shapes

10 WIRES
PER PACK

Regular R-NiTi has an anterior and a posterior curvature with posterior toe-in and lingual crown torque.

Straight Leg R-NiTi has only an anterior curvature with no posterior toe-in or torque.

20° Anterior Torquing NiTi

- ▶ This is a time saving NiTi archwire where the anterior segment has a built-in torque of 20°.
- ▶ Start torque correction of the anterior teeth as early as possible.
- ▶ Same wire could be used to achieve lingual root torque or buccal root torque.
- ▶ For lingual root torque, put the laser mark on the right side.
- ▶ For buccal root torque, put the laser mark on the left side.
- ▶ Color Code to identify sizes.

Available in 3 sizes:

- 28 mm lower
- 34 mm upper
- 38 mm upper

zefiro™ ARCHWIRES

With technology advancement, the dream of having two wire sizes or materials built into the same archwire becomes a reality.

- ▶ The anterior segment is thicker to maintain torque while the posterior segment is thinner for less friction during retraction.
- ▶ Joining hook could be used for elastics, coils or lacebacks.
- ▶ Use 16x22 & 17x25 for 18 slot brackets and 19x25 & 21x25 for 22 slot brackets.

HOOKS AND STOPS

Crimpable hooks "Straight"

- Hook bends easily in any direction
- Accepts welding to SS wire
- *Available for round and rectangular wire*
- Great for elastics or springs

	Item Number
Short	14-311-100
Long	14-311-101
Universal	14-311-102

10 HOOKS
PER
PACKAGE

Crimpable hooks "Curved"

- Special sturdy design to maintain the curve
- Easy to crimp on any rectangular wire
- Recommended to be used in retraction with mini-implants

	Item Number
Right	14-311-108
Left	14-311-109

10 HOOKS
PER
PACKAGE

Crimpable stops

- Crimps securely on archwire to act as a stop
- Quick application to activate open coils
- Item # 14-312-100

Quick activation of coil with a stop

10 STOPS
PER
PACKAGE

25
PER PACK

Item # 14-312-101

Mini Stops

- Extremely low profile & small in size, making them more aesthetically pleasing than regular crimpable stops.
- Very comfortable to the patient due to the small size.
- Slides easily onto the archwire for customized placement.
- Crimps easily into place with Weingart style Pliers.
- Made from SS.

SUPER LOCK™

- Quick secure movable attachment without welding or soldering
- Smooth cover for ultimate patient comfort
- *Available for round & rectangular wires*
- Regular lock: Round # 14-236-100, Rectangular # 14-236-101
- Lock with Right hook: Round # 14-236-102, Rectangular # 14-236-103
- Lock with Left hook: Round # 14-236-104, Rectangular # 14-236-105

COIL SPRINGS

Ultimate Open Coil

- Available in SS and NiTi:
- SS delivers light to heavy force depending on initial activation. Accepts in-mouth activation. Sold in 36" spool
- NiTi delivers gentle consistent force for reliable results. Great for pain sensitive patients, sold in 15" spool

MANY
DIFFERENT
USES
INCLUDING:

- Distalizing molars by placing the coil mesial to the molars
- Creating space for an impacted tooth
- Works with different appliances such as E-Arches, Inman Aligners, Max 2000 series...etc

COIL SPRINGS

Rotating Spring

- › Corrects mesiodistal rotation of an individual tooth
- › Designed to work with vertically slotted brackets
- › Available in:
 - * Clockwise (Right): item # 14-211-100
 - * Counter-clockwise (Left): item # 14-211-101

Warren Spring

- › Designed to add Lingual Root Torque for an individual tooth
- › Works with rectangular, minimum .017 x .025
- › Item # 14-214-100

SS Separating Spring

- › Provides a continuous gentle force to separate tight contacts.
- › .022" wire diameter for easy insertion
- › Made from hard SS
- › Item # 14-215-100

10 PIECES PER PACKAGE

NiTi Separating Spring

NARROW

- › Perfect for fast and comfortable separation.
- › Ectopic eruption and patients with a narrow marginal ridge.
- › .016 x .022 NiTi wire.
- › Item # 14-215-102

10 SPRINGS PER PACKAGE

WIDE

- › New version of the narrow one.
- › Designed with large teeth in mind.
- › Wide configurations fit easily across the marginal ridge and stay out of occlusion.
- › .016 x .022 NiTi wire.
- › Item # 14-215-103

De-Impacting Spring

- › Separate or de-impact posterior teeth with minimal patient discomfort
- › Rectangular NiTi wire provides long range of action
- › Looped end for patient comfort
- › Item # 14-215-101

10 SPRINGS PER PACKAGE

Before

After 3 months

COIL SPRINGS

Uprighting Spring

- › Upright an individual tooth mesiodistally
- › Designed to work with vertically slotted brackets
- › Available in:

LATEX-FREE LIGATURE TIES

➤ Improved module design for easy ligation

Available in **35 unique non-fading colors**

Use these ties to deliver less friction and allow teeth to move faster. Accepts figure 8 ligation method. Recommended to be used with all brackets. **Available in 2 types:**

REGULAR TIE

*Regular Tie: 24 modules per stick.
Good to ligate the whole mouth from
6 to 6. **42 sticks per pack.***

1008 TIES

MINI TIE

*Mini Tie: 10 Modules per stick. Good to ligate
one single arch from 5-5. Great way to reduce
cross-contamination. **100 sticks per pack.***

LIGATURE TIES

FIGURE 8 TIES

- > A new revolutionary tie designed to apply either passive or active ligation using traditional twin brackets.
- > When placed vertically, the wire is minimally pressed against the bracket which is useful during early treatment.
- > When placed horizontally, the wire is fully engaged in the bracket for maximum control.

Keep your chains organized by using one of the power chain organizers, check page 134 for details.

THREADS & SLEEVES ELASTOMERIC THREAD

- Made from high quality elastomeric resin that provides unmatched strength and rebound.
- **Available in 0.025 and 0.030 sizes.**
 - **Ultra Tuff thread** that maintains force over an extended period of time.
 - Highly stain resistant & has a unique rough surface that secures knots efficiently.

Size	Color	Length	Ultra Tuff
.025"	Gray	25" spool	15-531-100
.030"	Gray	25" spool	15-531-101

Tooth Color	15-541-102	15-551-102

Cut an archwire sleeve to a proper length and use it as a space maintainer.

LIP PROTECTOR

- Improves patient comfort & eliminates patient wax.
- Snaps easily into place and stays secure.
- Great for wind instrument musicians.
- Fits all types of brackets.
- **One upper and one lower per pack.**
- US Patent # 5037296.

Item # 15-940-100

Inside soft
clips for secure
protector
placement.

INTRAORAL ELASTICS

- › Manufactured from prime medical grade elastic.
- › Special packaging makes size identification & selection easy and fast.
- › Available in three types
 - **Latex elastic:** Traditional amber color.
 - **Non-Latex elastics:** Clear appearance, will not absorb water and will have a longer shelf life.
 - **Neon elastics:** Latex elastics that patients really enjoy.

	1/8"	3/16"	1/4"	5/16"	3/8"
	3 mm	5 mm	6 mm	8 mm	10 mm
Light 2.5 oz 70 gms					
Medium 4.5 oz 125 gms					
Heavy 6.5 oz 180 gms					

Each box contains 50 bags of 100 elastics

TIP

Force level is determined by measuring the force generated when elastic is stretched three times its shack diameter.

Vertical Main Frame

Highest quality Stainless Steel. Flat surface to prevent parts rotation.

Ergonomic Forehead Rest

smooth molded plastic with replaceable foam cushion

New Larger Screw Head

Highest quality Stainless Steel. Flat surface to prevent parts rotation.

Horizontal Cross Bar

Adjustable for precise angle of force delivery. Multiple grooves to prevent elastic slippage.

Ergonomic Chin Cap

The set-screw gives the option for a fixed position or a full range of motion to allow mouth opening and closing.

TRUEBOND™

True-Bond is a no-mix chemically cured adhesive that bonds to ceramic and stainless steel brackets. Simply apply a thin coat of adhesive to the bracket base and place the bracket on the primed tooth.

MAXIMUM ADHESIVE
STRENGTH IS REACHED IN

5 minutes

TrueBond Kit

- > 1 syringe with 5 gm of adhesive
- > 1 syringe of 3 ml gel etch
- > 1 bottle of 6.0 ml primer
- > 1 pack of 30 microbrushes
- > 1 mixing pad 2 1/8" x 2 3/4"
- > Item # 17-111-101

Replacement Part

- > 5 gm TrueBond adhesive in a syringe, Item # 17-911-100
- > 6 ml TrueBond primer, Item # 17-911-101
- > Mixing pad, Item # 17-911-103

TRUEBOND LC™

True-Bond LC represents a state-of-the-art technology, offering the most desirable characteristics, from the point of view of versatility, ease of handling, esthetics and reliability. High light sensitivity of the material allows for the use of the adhesive, not only for bonding the translucent (plastic or ceramic) brackets, but also, light impermeable metal ones. Simple procedure relief from pressure results in reproducible bonding strength and allows for precise bracket placement.

LIGHT
CURED

TrueBond LC Kit

- > 1 syringe with 5.0 gm of adhesive
- > 1 syringe of 3 ml gel etch
- > 1 bottle of 3.0 ml primer
- > 1 pack of 30 microbrushes
- > 1 mixing pad 2 1/8" x 2 3/4"

- > 3 ml TrueBond LC primer, Item # 17-912-101
- > Mixing pad, Item # 17-911-103

Banding Adhesives

DURABOND™

A fast, easy and convenient total-etch, single-component bonding agent offering exceptional bond strength.

6 gm
PER
BOTTLE

Benefits

- › Excellent extra shear bond strength provides exceptional bonding performance.
- › Cap snaps securely shut minimizing evaporation.
- › Nanofiller is stable and will not settle out of dispersion.
- › Ethanol/water-based adhesive maintains its shear bond strength over time to yield an outstanding shelf life.

Indications for Use

- › All direct, light-cured bonding procedures with metal brackets, ceramic brackets & lingual braces.
- › Excellent choice to use for invisalign™/clear correct™ attachments.
- › Indirect bonding procedures.

Recommended with TrueBondLC 17-912-100.

Item # 17-912-102

BAND GUARD™

- › Provides a fast and easy way to bond bands with the strength needed
- › **Fluoride release** promotes remineralization and prevents decalcification under the bands
- › Acid etch is not necessary and curing occurs in less than 30 seconds
- › Light cured

› Item # 17-211-100

5 gm

SYRINGE

BAND GUARD™ plus

AUTOMIX DUAL CURE GLASS IONOMER BAND CEMENT WITH FLUORIDE RELEASE

- › Save time with the automix tip. No more messy mixing
- › Chemical curing in 3-5 minutes or immediately cured using a dental curing light
- › Fluoride releasing cement is beneficial for every banded tooth to prevent enamel decalcification
- › Satisfaction guaranteed

Available in 2 colors:

- › Blue shade: Item # 17-211-120
- › A2 shade: Item # 17-211-121

› INCLUDING 5 MIXING TIPS

10 gm
PER
SYRINGE

GLASS IONOMER CEMENT

- › Flows easily to cover the entire crown during the banding procedure
- › Fluoride releasing cement is beneficial for every banded tooth to prevent enamel decalcification
- › Prolonged sitting time "3 minutes" for easier appliance cementing

Available in 2 sizes:

- › **Regular kit:** 15 gm powder, 15 ml liquid, mixing pad & a spoon. Item # 17-211-102
- › **Economy kit:** 100 gm powder, 60 ml liquid, mixing pad & a spoon. Item # 17-211-103

I N S T R U M E N T S

B RILLIANT™ INSTRUMENTS ARE MADE FROM THE HIGHEST QUALITY FORGED STAINLESS STEEL. FORGED INSTRUMENTS ARE STRONGER THAN CASTED INSTRUMENTS. ORBITAL JOINT FOR MAXIMUM PERFORMANCE & DURABILITY. SUPERIOR PERFORMANCE OVER BOX AND HEX JOINT.

IOS's Exclusive Warranty

All instruments manufactured by IOS carry a Five-Year warranty on material, workmanship, and corrosion resistance. With normal maintenance and proper use, these high quality instruments will work for years!

Distal End Cutter

“Non TC” CUTTER”

Distal End Cutter

Safely cuts and securely holds distal end of arch wires. Precise cut to prevent wire deformation. 0.5 mm clearance.

Max: .021x.028 SS, NiTi, TMA

Regular handle Item # 18-110

Long handle Item # 18-112
Provides better access to clip wires behind second molars.

Distal End Cutter

Flush Cut w/safety

Prevents patient discomfort by cutting wires flush to the molar tubes. Sharper head for smooth and clean cut.

Max: .021x.028 SS, NiTi, TMA

STANDARD HARD WIRE CUTTER

will cut straight through
the **toughest wires**

Standard Hard Wire Cutter

*Specially designed to cut hard wires.
Designed to cut pins, ligatures, any wire
size up to .021 x .028 SS, NiTi TMA*

Straight head Item # 18-120

15° head **Item # 18-121**

┐ Ligature Straight Cutters

FOR MAXIMUM PERFORMANCE OF LIGATURE CUTTERS:

- Do not cut braided ligature wires.
- Do not cut wires exceeding the maximum cutting capacity of the instrument.
- Do not cut any archwire.

Pin & Ligature Cutter

Special steel insert for maximum durability. Designed to cut pins, ligatures, any wire size up to .012"

Straight head Item # 18-130

15° Head Item # 18-132

Mini Pin & Ligature Cutter

Same as Pin & Ligature Cutter, 25% smaller head; maximum wire size .012"

Bending Pliers

BIRD BEAK PLIER

Most popular plier to bend archwires during regular adjustments. Fine tip with .025" diameter.

Max: .021 x .028 SS

With groove Item # 18-201

Without groove Item # 18-202

BIRD BEAK PLIER WITH CUTTER

Same as our regular bird beak plier with cutter on the back.

Max: .021 x .028 SS

With groove Item # 18-203

Without groove Item # 18-204

HEAVY DUTY BIRD BEAK, "ADAM'S PLIER"

Designed to bend heavy wires and adjust retainers.

Tip is .030" wide.

Max: .036" SS

Item # 18-205

Bending Pliers

JARABAK PLIER

Ideal to create and manipulate loops, with serrated tips for secure wire holding.

Item # 18-208

Item # 18-209

3 in 1® PLIER

This unique plier features **three distinct surfaces**:

- **Bird beak tip** for bending wires up to .020" with two grooves on the tip.
- **Hollow chop** surface for contouring and reshaping arch wires.
- **Hard wire cutter**.

LIGHT WIRE PLIER

Designed to make precise bends and loops with longer nose. Max: .020 SS, TMA

With groove Item # 18-206

Without groove Item # 18-207

TWEED CONTOURING PLIER

Ideal for bending square and rectangular wires. Use this plier to make step up, step down, apply positive or negative torque, etc. Tips are parallel when opened to .020" Max: .021 x .028 SS

1.0 mm thickness Item # 18-220

1.5 mm thickness Item # 18-221

THREE PRONG PLIER

The Double Tip is designed in one piece for maximum strength. Great for making V-bends extraorally or for retainer adjustment.

Item # 18-210

MINI THREE PRONG PLIER

Designed to bend NiTi wires permanently. Tiny head enables intraoral adjustment. Max .019 x .025 NiTi, .018 SS

Item # 18-211

Bending Pliers

Tweed Loop Forming Plier

Traditional Tweed plier for making consistent omega and other loops. Three sections of .045", .060", and .075" diameters. Serrated tip for even wire holding.

Max: .019 x .025 SS, TMA

Item # 18-230

- Make a Ballista loop quickly with this plier

Vertical Loop Forming Plier

All you need to make retraction loops. 2mm, 3mm, 4mm and 5mm vertical loops. Works with round and rectangular wires.

Item # 18-308

Hollow Chop Plier

Contouring plier to reshape archwires
Max: .021 x .028 SS

Item # 18-258

NiTi Chilling Tool

Use this lightweight wand to chill and instantly soften thermal NiTi archwires. Simply fill the tube with water and place it in the freezer. Once frozen, you are ready to go.

Item # 18-881

Slotted head for easier wire placement.

Special Bending Pliers

CINCH BACK PLIER

Double-headed plier designed to cinch back SS and NiTi wires in all quadrants. Double head for easy access to right and left sides.
Max, .019x.025
NiTi, .016x.022 SS

Item # 18-301

LINGUAL PLIER

Perfect for making TPA and its activation. Creates double back and triple back bends in .030 and .036 lingual arch wires.

Item # 18-302

DETAILING PLIER

Double-sided intraoral plier to apply quick step up or step down without removing the wire.
Max: .021 x .028 SS,
TMA and Braided wire.

1 mm step Item # 18-303
1.5 mm step Item # 18-304

NANCE PLIER

Ideal to create & manipulate loops with serrated tips for secure wire holding.

Four different loop heights

Item # 18-306

OMEGA LOOP PLIER

Traditional plier to make omega stops in a few quick steps.

Item # 18-307

1- Put a mark on the wire where the distal part of the stop will end.

2- Hold the plier so the vertical part will be DOWN for a mandibular stop and UP for a maxillary stop. In Fig. 2, the plier is positioned to form a stop for the LR6. Place the mark on the bottom distal beak relative to the molar*; in this case on the lower right beak.

3- Squeeze the plier to form a nice U-shape loop.

4- Place the loop in the perpendicular slot of the plier and squeeze to the desired size, and...

5- The loop is ready.

6- Shows actual measurement of loop size.

*The exact location may differ slightly based on the wire size.

Special Pliers

Torquing Plier "Male"

Apply buccal or lingual torque to any individual tooth.

Max: .021x .028 SS or TMA

Item # 18-330

Torquing Plier "Female"

Apply buccal or lingual torque to any individual tooth.

Item # 18-331

Plastic Preforming Plier

Emphasizes over-correction of rotations by producing an indentation at the mesial or distal line angles on the facial and/or lingual side of a specific tooth.

Regular head Item # 18-361

Small head Item # 18-360

Crimpable Hook Plier

New design with beveled tips and long handle for secure placement of crimpable hooks and stops without wire distortion "Three prong effect".

Item # 18-320

Head Gear Plier

This Plier was designed to adjust and make vertical loops made of wire sizes up to .050" SS. Long handle with heavy head for superior performance.

Item # 18-350

V-Bend Plier

This unique plier is designed to form permanent V-Bends on both SS and NiTi wires!! V-bends act as a stop to prevent wires from shifting, and could be applied to make the wire shorter.

Max: 19x25 SS & NiTi

Item # 18-305

Banding Pliers

BAND REMOVING PLIER

When the padded tip is on the occlusal surface, the non-padded tip lies securely under the attachment or the band edge for easy band removal.

Item # 18-401

Replacement Pad
Item # 18-401-1
for both Items:
18-401, and # 18-402

BAND REMOVING PLIER SHORT

Shorter beak is preferred for large molar bands. May be used for appliance removal such as a bonded RPE.

Item # 18-402

BAND CONTOURING PLIER

Reshape crowns and bands for the perfect fit. Fine head and precise contouring.

Item # 18-405

BAND SEATING PLIER

This plier features a thin head to grip the buccal attachment securely while seating the band. The beaks are very strong, and the unique serration pattern makes it easier to manipulate the band.

Item # 18-410

CONVERTING PLIER

Designed to easily remove caps from convertible tubes. Long slim head to access hard-to-reach areas.

Item # 18-411

Replacement Blade
Item # 18-411-1

Debonding Pliers

NARROW DEBONDING PLIER

Narrow tips wedge between the bracket base and the tooth surface to lift the bracket with no stress. May be used mesio-distally or occluso-lingually.

Item # 18-430

Replacement Tips
Item # 18-430-1

WIDE DEBONDING PLIER

Same great features as 18-430 but with wider tips.

Item # 18-431

Replacement Tips
Item # 18-431-1

ANGLED DEBONDING PLIER

Designed to remove all attachments in the anterior and posterior region. Angled perfectly for easy access to difficult posterior and lingual areas.

Item # 18-432

ADHESIVE REMOVING PLIER

Sharp inserted beak fits under the adhesive remaining on the tooth for easy removal. Pads are suitable for high heat sterilization.

Item # 18-440

Replacement Pad
Item # 18-440-1

CERAMIC BRACKET DEBONDING PLIER

This plier was designed to remove ceramic brackets easily without the risk of shattering. The beaks are specifically engineered to apply even pressure on the bracket causing it to collapse. Could be used for SS brackets.

Item # 18-435

- 1 Remove archwire.
- 2 Place the plier flush on the bracket mesio-distally. Do not use it occluso-lingually as the wings will break.
- 3 Gently squeeze the bracket to collapse. Do not apply too much pressure as the bracket may fracture.

Utility Pliers

WEINGART PLIER

20° angled tip for maximum comfort. Convenient to work with. Smaller tip for easier access in hard-to-reach areas.

Regular handle **Item # 18-450**

Long handle **Item # 18-451**

90° UTILITY PLIER

This plier has a 90° angled tip that facilitates TPA insertion and removal. Also great for lingual braces.

Item # 18-465

HOWE PLIER

Serrated tip for secure wire holding. Beaks are rounded for lip safety and comfort.

Item # 18-460

Lab Pliers

THREE PRONG PLIER

The Double Tip is designed in one piece for maximum strength. Great for making V-bends extraorally or for retainer adjustment.

Item # 18-210

ADAM'S PLIER

Designed to bend heavy wires and adjust retainers. Tip is .030" wide. Max: .036" SS

Item # 18-205

MULTI-FUNCTION LAB PLIER

Bending head on the front, contouring in the middle and three prong on the back. Also, designed with a cutter in the joint area. Max: .0.045" (1.15mm) SS.

Item # 18-522

HAWLEY PLIER

This is the plier to create perfect and consistent hawley loops for retainers. Serrated base secures the wire in place. The posterior part has a curved part for bending straight wires.

Item # 18-502

18-620

18-621

18-622

Item # 18-710

LINGUAL MATHIEU HEMOSTAT

Specially designed for easy ligature placement with lingual braces. Tip will hold elastic module securely.

Item # 18-720

CONE STYLE LIGATURE TYING PLIER

Designed for faster and tighter ligature tying. Chamfered slot for secure ligature holding.

Item # 18-730

Sterilization

To maximize your instrument's life, follow these easy steps

1. Clean instruments in the ultrasonic for 7-10 minutes using proper solution. Ultrasonic is NOT recommended for cutting pliers as it could dull or damage the cutting edge. For cutters, use high-volume sterile water. Never use any hard objects such as metal brush or pan scrubber to clean instruments as this would destroy the outer surface and increase the danger of oxidation.
2. Rinse instruments with distilled or filtered water. Rinsing with regular tap water may contain a high level of silicate, which leads to stain formation on instruments during sterilization.
3. Dry instruments with compressed air, especially in the joint area.
4. Sterilize with:

Recommended

- **Autoclave:** Sterilize for 12 minutes at 134° C using sterile water. Do NOT mix rusty instruments with clean instruments as a rusty film could be formed on the clean instruments.

- **Dry Heat:** Sterilize for 6 - 30 minutes at 160° C based on equipment instruction. Do NOT sterilize at temperatures exceeding 180° C as this may dull the cutting edges, impair the tip hardness, and/or cause discoloration. All hinged instruments should be placed open.

- **Cold (2% Glutaraldehyde):** Immerse instruments in the prepared bath for recommended time. Never leave instruments in the bath overnight or over the weekend. After cold sterilization, pliers and instruments must be thoroughly cleaned and rinsed with distilled water to remove any chemical residues.

Lubrication is recommended for hinged instruments with paraffin-oil spray. Do not use WD40. With dry heat, only lubricate inside the joint as the outer area may get stained when contaminated.

SUPER CHEEK RETRACTOR

- > This retractor has an extra wing to push the cheek further away from buccal dentition

> Autoclavable up to 270° F (132° C)

- > Ultra-smooth surface for maximum patient's comfort

Available in 2 sizes:

Small size; Red, Item # 19-121-103
Large size; Blue, Item # 19-121-104

INTRAORAL CHEEK RETRACTOR WITH TONGUE DEPRESSOR

- > Great for initial bonding to provide you with maximum view of all the teeth
- > Tongue depressor ensures field dryness
- > Break resistant crystal clear plastic tray
- > Autoclavable up to 270° F (132° C)
- > Ultra-smooth surface for maximum patient comfort

PHOTOGRAPHIC CHEEK RETRACTOR

- > Designed to provide a buccal extension to hold the lips and cheeks away from the teeth, resulting in an improved intraoral photography
- > Autoclavable up to 270° F (132° C)
- > Ultra-smooth surface for maximum patient comfort

PHOTOGRAPHIC CHEEK & LIP RETRACTOR

- > Designed with one end to hold the cheek away and the other end to hold the entire lip away for an improved intraoral photography
- > Autoclavable up to 270° F (132° C)
- > Ultra-smooth surface for maximum patient comfort

SS CHEEK RETRACTOR

- > Made of stainless steel wire can be used both sides Special for oral photography
- > Length ca.12cm > Autoclavable up to 270 F (132 C)
- > Double ended with large retractor on one side (4.2 cm) & small retractor on other side 3.00cm)

LIP RETRACTOR

- > Great protection for lips during interproximal stripping
- > Cold sterilizable
- > High medical grade plastic
- > Universal size for children and adults

DISPOSABLE TONGUE BLOCK

- > Acts as a bite block and as a tongue block
- > Two holes to fit the saliva ejector "optional"
- > Soft plastic that could be trimmed if needed

10 BLOCKS PER BAG

Available in 2 sizes:

NOLA DRY FIELD SYSTEM

- > Full arch access for bonding with maximum patient comfort
- > Provides a completely dry field by effectively eliminating saliva from the floor of the mouth
- > Extremely durable and autoclavable
- > Compatible with low or high volume suction

AVAILABLE IN 2 SIZES:

Small "Red" Item # 19-141-100

Large "White" Item # 19-141-101

SYSTEM INCLUDES:

1 cheek retractor, 1 flexible connector,
1 tongue guard, 2 suction tubes,
1 Y-connector with low-volume adapter.
For high-volume adapter, add H after the
Item number.

Adjustable
cheek retractor
for maximum
patient comfort

Adjustable tongue
guard to keep
the tongue as far
away as possible

Generous suction
hole on each side
to keep mouth as
dry as possible

Y-adapter connects
the two suction
tubes to either the
low or high volume
suction

REPRESENTATIVES.

N E W

Raydent

One piece, portable and light weight device that employs an ergonomic pen-style construction that can enhance comfort and reduce strain for the operator.

Light output Port or curing light tip has a wider-diameter. You will not require an overlapping of the tip and many curing areas to guarantee complete polymerization of the restoration.

Advanced beam collimation to reduce the divergence of the beam to maximize curing power in deep preps, delivering focused, powerful, and effective curing.

Most adhesives and composites are cured in the spectrum of 450 nm to 480 nm.
Our Led curing light offers a spectrum of 385 nm-510nm.

Powerful LED bulb with a high intensity of 1700 mW/cm² that you can adjust to standard mode 1700mW/cm², or soft start mode 100 to 1700Mw/cm² if you prefer for fast, efficient, and complete curing that delivers consistent and predictable results.

Wall plug cord and USB charger to provide interrupted power during your practice.

Power verification indicator.

THE ORIGINAL RIO-FOTO MIRRORS

- > High quality thick glass mirrors coated with Rhodium for maximum reflectance and durability.
- > Designed especially for intra-oral photography for both dentists and orthodontists.
- > Provides clear, sharp images when used with either 35 mm or digital cameras.
- > Dual-sided mirrors for extra long life.
- > Heat sterilize or autoclave up to 370 F, 188 C.
- > Most durable mirrors in the market ever.

*Available in
8 different shapes for
pediatric & adult
patients*

***Rhodium is the
difference!***

*Rhodium is a hard silvery
metal of the platinum group
that is durable and has a high
reflectance. It is the most
expensive precious metal*

EXPANDERS

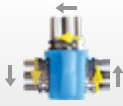

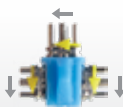

- IOS offers a wide range of special and standard expansion screws. All pins & threads are manufactured from medically biocompatible stainless steel, while the housing is available in nickel, silver, and stainless steel. Screw threads have a low tolerance of .01mm and are very secure to ensure stability. All screws come with one activation key.

SKELETAL EXPANDERS

Beveled hole entrance for easier key insertion

ANATOMICAL RAPID PALATAL EXPANDER

- Extremely special screw for rapid palatal expansion. The anatomically designed shape minimizes space requirements in the palate. Pre-formed, laser welded retention arms, stable guiding pins and generously dimensioned threaded spindle for the greatest possible safety and force transmission. Screw is designed with anti-rotation mechanism. Comes with one regular key.

Item #	Size	Full Turn	Maximum Expansion
19-532-100	5 mm	0.9 mm	10 mm
19-532-101	9 mm	0.9 mm	13 mm

PACKAGING

IOS utilizes standardized packaging. This helps our customers clearly identify the product, its manufacturer, and proper handling and storage of the product. Symbols will appear on packaging.

	Single Use Only		Manufacturer - before company name/address		Storage Temperature
	Caution		EC representative		Do Not Store in Direct Sunlight
	Use By Date		Lot Number - on separate sticker		Product contains latex
	See Instructions for Use		Shown on products		Product is latex-free
	Non Sterile		Shown on products if in the mouth more than 30 days		Nickel / Chromium Warning WARNING: This product contains nickel and/or chromium. Patients with an identified allergy to these metals SHOULD NOT use this product. In undiagnosed patients, if irritation occurs, discontinue use IMMEDIATELY and contact a physician.
			Always appears before PART # reference

Warranty and Ordering Terms and Conditions of Sale

Special Warranty Information for Hand Instruments

IOS warrants that this instrument will be free from defects in material, manufacture or separation of brazed cutting edges for a period of 1 year from the date of purchase. IOS warrants that this instrument will be resistant to corrosion for 5 years from the date of purchase. Failure to follow recommended use, maintenance and sterilization procedures will void all warranty claims. Recommended maintenance include cutter tip/blade re-sharpening and reconditioning (cleaning, polishing, adjusting screw as necessary) every six months. IOS's sole obligation and buyer's sole remedy in the event of a claimed defect shall be limited to, at IOS's option, repair, replacement of merchandise, or refund of the purchase price.

Materials, manufacture, and corrosion resistance are the only items covered by this warranty. Misuse or abuse will void warranty. Buyer will be contacted regarding repair charges for out of warranty instruments.

Waiver of Implied Warranties

ALL IMPLIED WARRANTIES, INCLUDING IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OR USE ARE DISCLAIMED.

Return Policy

Customer Service must be called within 24 hours of delivery to obtain an RMA# from our Quality Control Manager before

a credit/replacement can be issued. You will need to provide the invoice number on which you were charged for the product. Items are to be returned in its original packaging. Return of non-defective items are subject to a 15% restocking charge. A finance charge will be assessed on all invoices over 30 days old at 1.5% per month.

Limitation of Liability

Except where prohibited by law, IOS will not be liable for any loss or damages arising from any products, whether direct, indirect, special, incidental or consequential, regardless of the theory asserted, including warranty, contract, negligence or strict liability.

Product Changes

Products are continually undergoing refinement in design and manufacture. IOS reserves the right to improve, modify or discontinue products at any time.

Termination for Default

IOS may terminate an order, in whole or in part, if buyer is in breach of a material obligation and does not cure such breach to the reasonable satisfaction of IOS within ten (10) days of IOS's written notice of intent to terminate the order for buyer's default.

Waiver

Any failure or delay by either party in exercising any right or remedy provided by or relating to the order or these Terms

and Conditions does not constitute a waiver and shall not prohibit a party from exercising such right or remedy at a later time or from exercising any other right or remedy available.

Entire Agreement

These terms and conditions of sale constitute the entire agreement between the parties with respect to the product sale except for the price set by the applicable IOS quotations, IOS price sheet, or separate pricing agreement; and by any additional IOS terms and conditions agreed to by the buyer electronically or in writing.
